The Government of India is planning to fix a hoarding board at the face of the building on the road of a busy market for awareness on COVID – 19 protocol. Ram, Robert and Rahim are the three engineers who are working on the project. “A” is considered to be a person viewing the hoarding board 20 meters away from the building, standing at the edge of a pathway nearby. CS- 2 While working with excel, we need to switch or rotate cells. You can do this by copying, pasting, and using the Transpose option. But doing that creates duplicated data. If you don't want that, you can type a formula instead using the TRANSPOSE function. For example, in the following picture the formula =**TRANSPOSE(A1:B4)** takes the cells A1 through B4 and arranges them horizontally.
