

## **HUMAN ANATOMY AND PHYSIOLOGY – I**

### **UNIT – III BODY FLUIDS AND BLOOD, LYMPHATIC SYSTEM**

#### **2 Marks:**

1. Composition of lymph
2. Define coagulation and erythropoiesis
3. Function of reticulo endothelium system
4. Function of WBC
5. Function of spleen
6. Blood group and its significance
7. Chirstmas factor
8. Structure of lymph node and its function
9. Fate of RBC
10. Haemoglobin
11. Types of anaemia
12. Haemophilia and purpura
13. Platelet function
14. Rh factor
15. Peyers patches
16. Erythroblastosis foetalis
