## UNIT II ARITHMETIC OPERATIONS

Addition and subtraction of signed numbers - Design of fast adders Multiplication of positive numbers - Signed operand multiplication- fast

## Recap the previous Class

## Manual Multiplication Algorithm

binary multiplication

| 1101 |
| :---: |
| $\times 1011$ |
| 1011 |
| $+\quad 0000$ |
| 1011 |
| 10001111 |

Binary multiplication is even easier than decimal, because we have either multiplication by 1 or by 0 in the intermediate sums.
