COURSE NAME : 19CST201-Agile Software Engineering
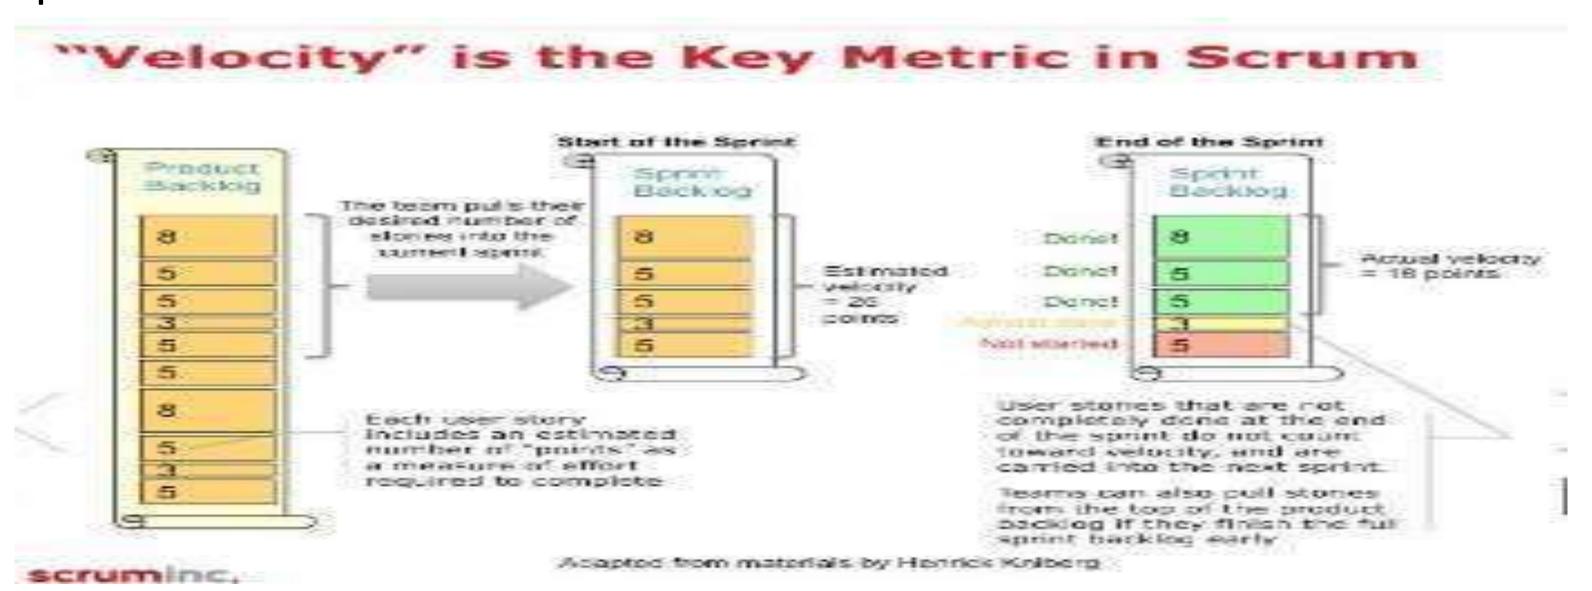

III YEAR/ V SEMESTER

Topic: Project Velocity

Ms.G.Swathi

Assistant Professor

Department of Computer Science and Engineering

PROJECT VELOCITY

- Velocity is a measure of the amount of work a Team can tackle during a single Sprint and is the key metric in Scrum.
- Velocity is calculated at the end of the Sprint by totaling the Points for all fully completed User Stories.

PROJECT VELOCITY

- Points from partially-completed or incomplete stories should not be counted in calculating velocity.

- Velocity should be tracked throughout the Sprint on the **Sprint Burndown Chart** and be made visible to all Team members.
