| 19 | An advantage of preparing Cash Flow Statement is:- <br> i. Cash flow statement when used along with other financial statements provides information that enable users to evaluate changes in net assets of the enterprises, its financial structure and its ability to affect the amount and the timings of cash flows in order to adapt to changing circumstances and opportunities. <br> ii. Cash flow information is useful in assessing the ability of enterprise to generate cash and cash equivalents and enable users to develop models to assess and compare the present value of the future cash flows of different enterprises <br> iii. It also enhances the comparability of the reporting of operating performance by different enterprises because it eliminates the effects of using different accounting treatments for the same transactions and events. <br> iv. It also helps in balancing the cash inflow and cash outflow, keeping in response to changing conditions. It is also helpful in checking the accuracy of the past assessment of future cash flows and in examining the relationship between profitability and net cash flow and impact of changing prices.
