EXERCISES Comprehension

1. Complete the sentences with words from the text.

a. Hues b. feelings, emotions c. Kolam, rangoli d. Miniature e. Warli

2. Choose the correct answer.

a. renaissance b. impressionism c. modern art d. Louvre e. promote

3. Answer the following questions.

a. What is the meaning of Spectrum?

Spectrum is the arrangement of colours of the rainbow in their natural order.

b. What are the three types of colours. Explain them?

The three types of colours are primary, secondary, and tertiary. The primary colours—red, yellow, blue—are the basic colours that are used to mix all the other hues. The secondary colours—orange, green, purple—are formed when any two primary colours are mixed together. The tertiary colours are formed when a primary and a secondary colour adjacent on the colour wheel are mixed together.

c. Write a short note on Bhimbetka.

Bhimbetka in Madhya Pradesh is home to some of the oldest cave paintings in the world. These paintings weren't etched in the stone but were painted using prehistoric forms of dyes and pigments. These caves are now World Heritage Sites.

d. What is so amazing about cave painting?

The amazing thing about cave paintings is that they weren't etched in stone. They were actually painted using prehistoric forms of dyes and pigments. The paintings have stood the test of time and bear witness to the first ever art forms of human beings.

e. Why should we value and preserve artist work?

We should value and preserve artists' works because art is like language; they help in expressing and communicating.
