

**Work sheet**  
**Lesson 5**  
**Say Cheese**

I. Name the following

1. Name the shiny white portion of the tooth visible above the gums.
2. This part of a tooth is embedded within the gums and extends into the jawbone. It holds the tooth firmly in place.
3. The narrow portion of the tooth between the crown and the root.
4. The pink flesh that surrounds your teeth.
5. The innermost softest layer of the tooth.
6. The hard white coloured outer covering that covers the crown of the tooth.
7. The yellow-coloured layer below the enamel protects the nerves.
8. The flat and broad teeth at the back of our mouth are responsible for grinding the food we eat.
9. The teeth that lie after the incisors, pointed and sharp help us by tearing into the food we eat.
10. The sticky layer of germs on the teeth.
