Unit-1-Topic - Brainstorm & Logic Puzzles for TTE Doppler and Cardiac Dimensions

Spot the Odd One — Doppler Edition

Four statements:

- A. PW Doppler can measure flow velocity at a specific depth
- B. B. CW Doppler measures high velocities without aliasing
- C. Colour Doppler can quantify exact peak velocities
- D. CW Doppler cannot provide range specificity

Which Doppler statement is the odd one out?

Puzzle: Which is the odd one out and why?
