### **COURSE NAME : 19EE01 BASIC ELECTRICAL AND ELECTRONICS ENGINEERING**

#### I YEAR /II SEMESTER COMPUTER SCIENCE & TECHNOLOGY

Unit 1 – Electrical Circuits and Measurements

Introduction to Measuring Instruments

## **MEASURING INSTRUMENTS**

Why do we need measuring instruments in Electrical and Electronics Engineering?

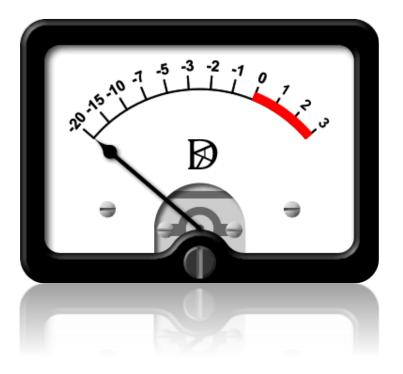

The instruments used for all electrical measurements are called measuring instruments. They include ammeters, voltmeters, wattmeters, energy meters etc.

### **BASIC PRINCIPLE**

### **OMG!!** How it works?

How is the pointer moving?

How do instruments operating to measure electrical and electronic quantities?

## **DEFLECTING TORQUE**

• Have you ever played with a magnet ?

• Electrostatic effect is used mainly for the deflecting torque makes the pointer moves from zero position to the final position.

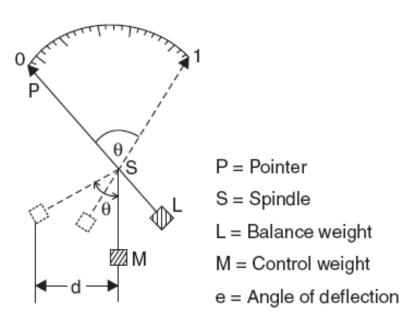

# **CONTROLLING TORQUE**

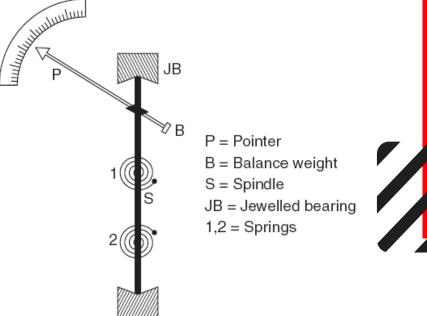

Controlling torque are used to keep the pointer of the instrument in one position and return back if its OFF

**Gravity Control** 

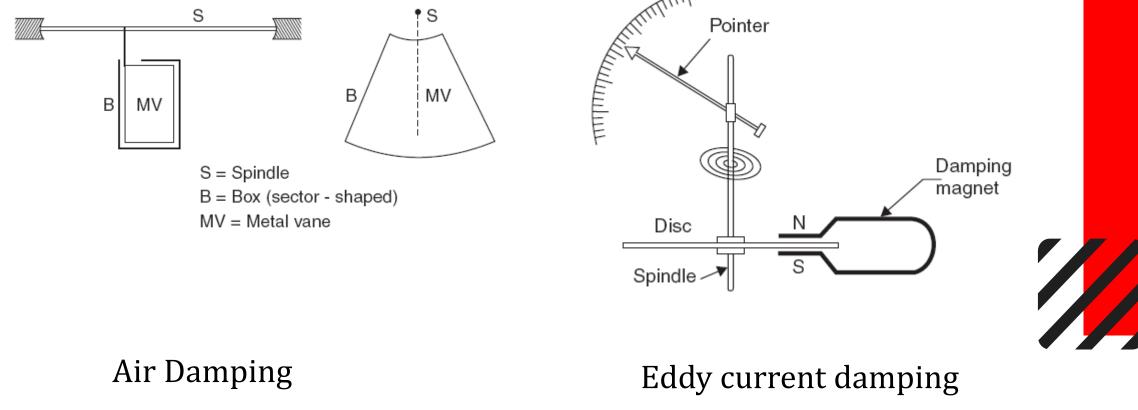

# **DAMPING TORQUE**

It is used to reduced the oscillations of pointer and also to reach the rest position of the pointer

# **ASSESSMENT 1**

1.\_\_\_\_\_\_is used mainly for the deflecting torque makes the pointer moves from zero position to the final position.

2. Damping is used to reduce the \_\_\_\_\_\_ of pointer and also to reach the rest position of the pointer
