

# **SNS COLLEGE OF NURSING COIMBATORE-35**

**Course** : B.Sc Nursing

**Subject** : Management of nursing services  
and education

**Unit** : II

**Topic** : Current trends and issues in nursing

**Prepared By** : Prof.Manavalam N

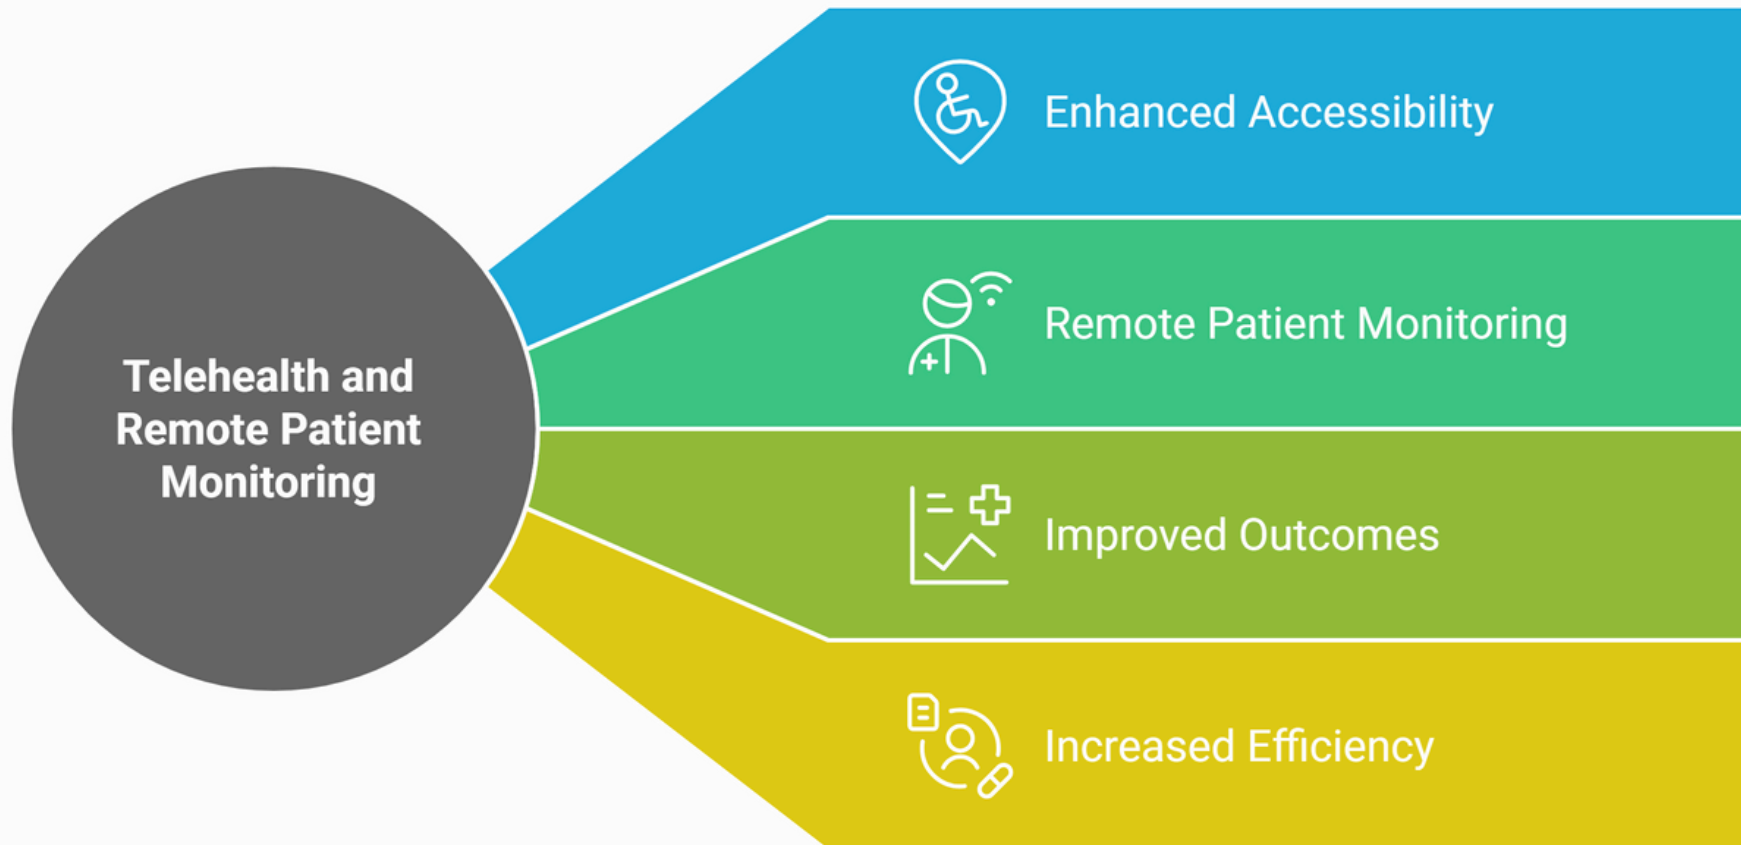

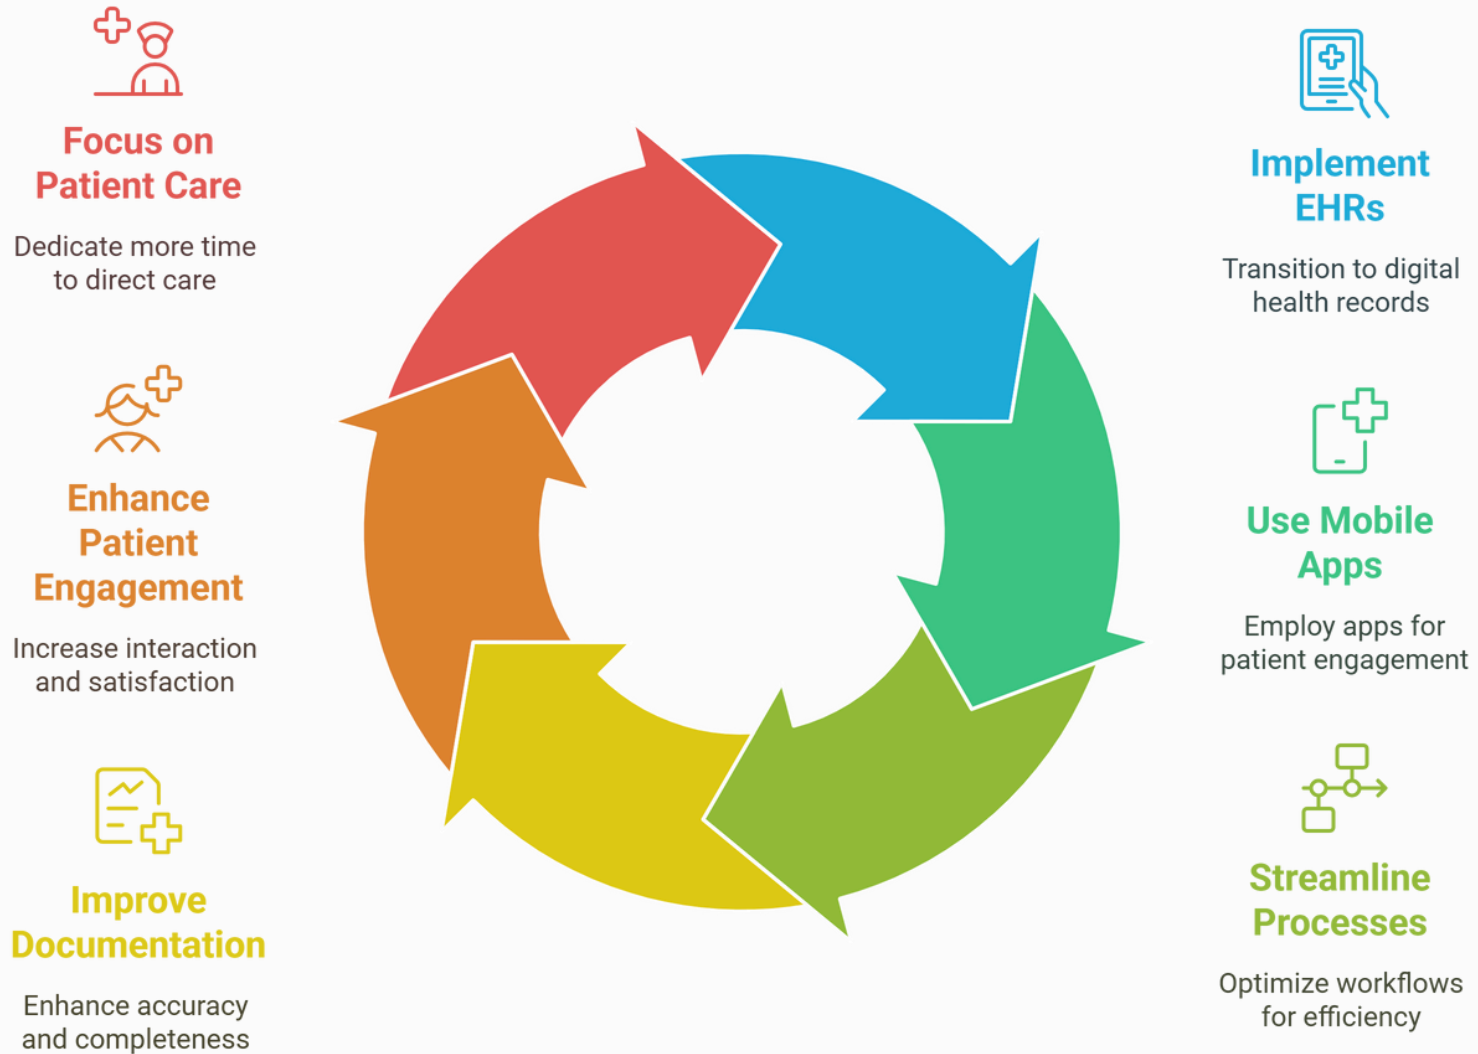

# OBJECTIVES

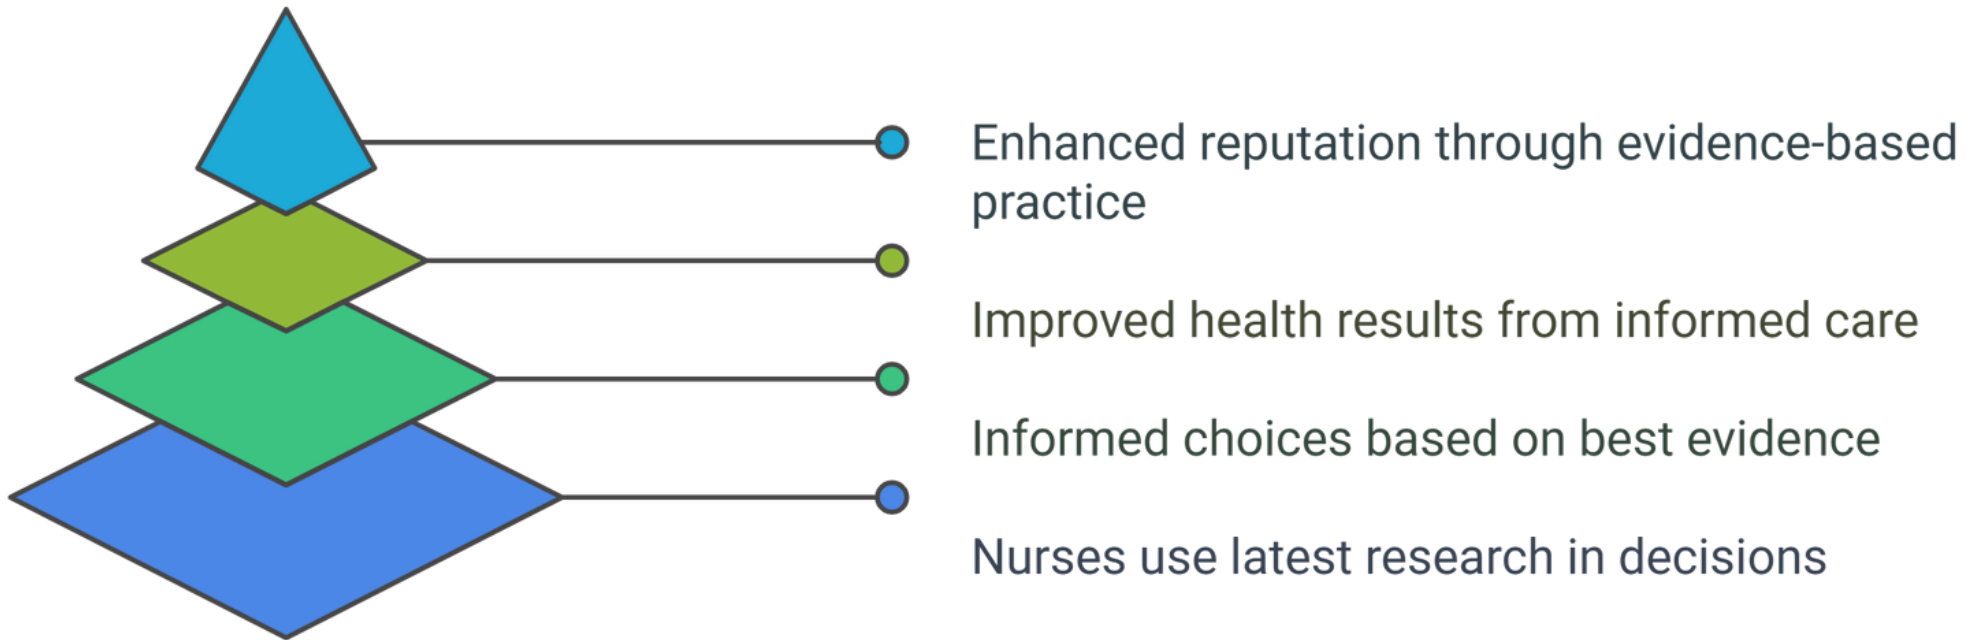

- Describe the current trends in nursing
- Describe the current issues in nursing

The nursing profession is continuously evolving, influenced by advancements in technology, changes in healthcare policies, and the growing demands of patient care. This document explores the latest trends in nursing, highlighting the significant shifts that are shaping the future of the profession. From the integration of telehealth to the emphasis on mental health, these trends reflect the dynamic nature of nursing and its critical role in the healthcare system.

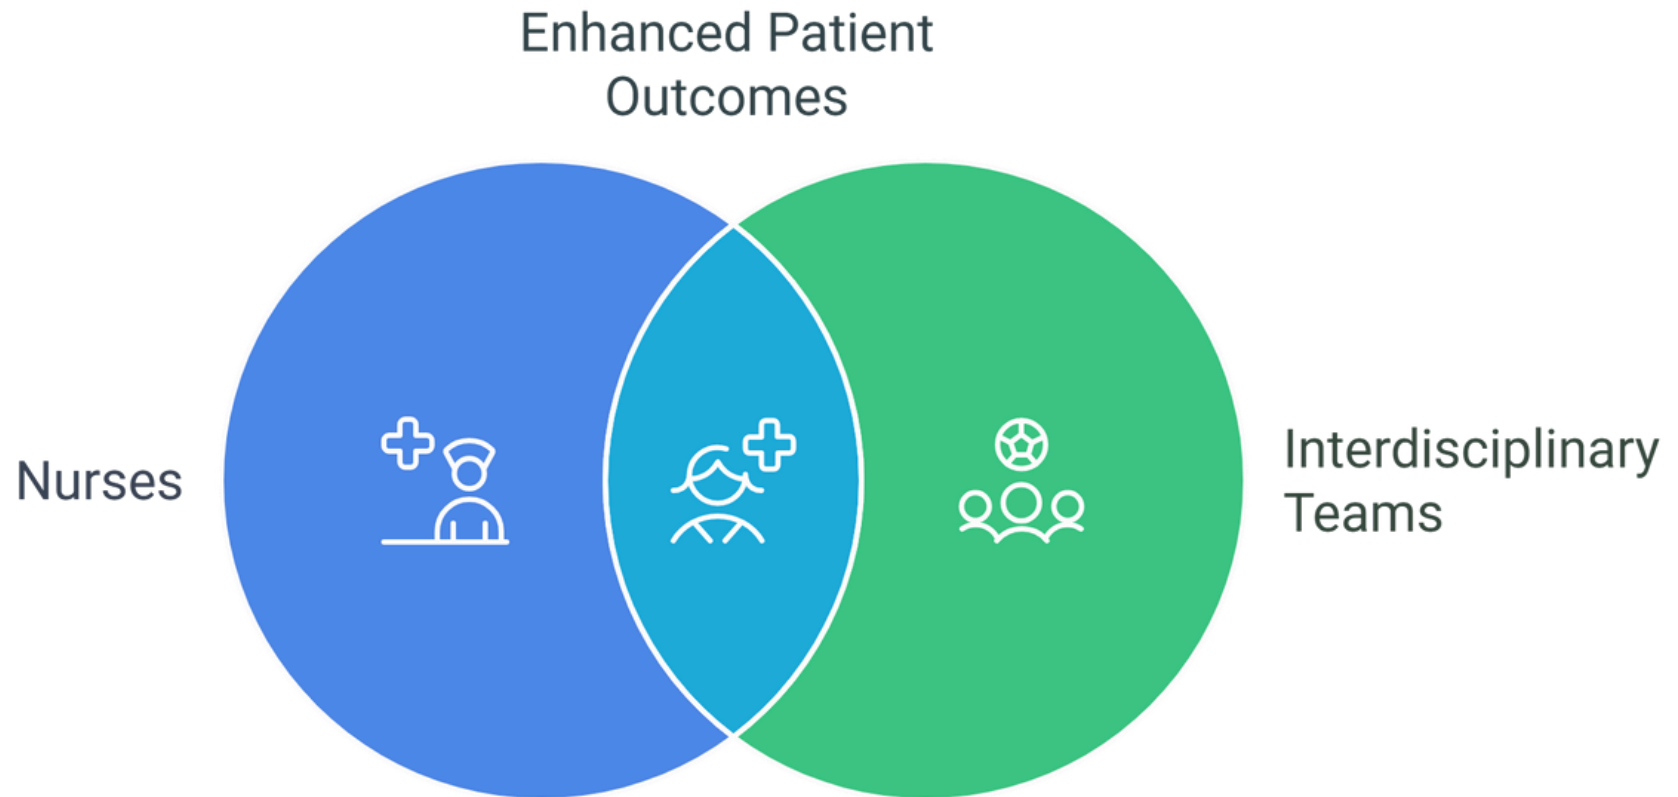

# EVIDENCE BASED PRACTICE

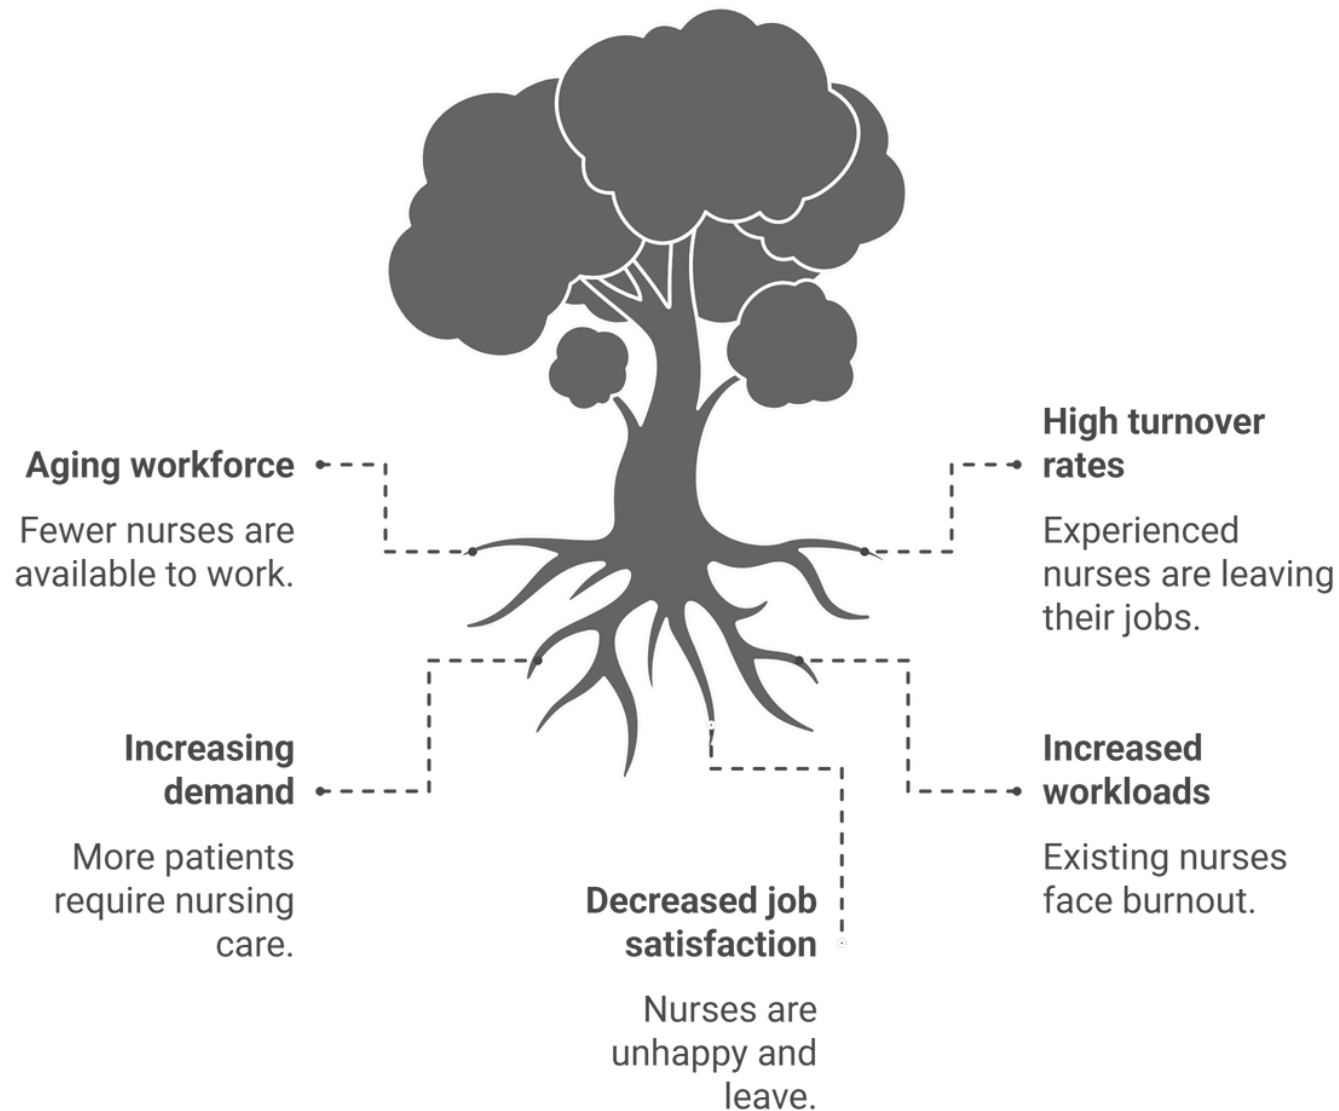

## Synergy in Patient Care Teams

The nursing profession is facing a myriad of challenges that impact both healthcare providers and patients. This document explores some of the most pressing issues in nursing today, including staffing shortages, mental health concerns, the impact of technology, and the ongoing effects of the COVID-19 pandemic. Understanding these issues is crucial for improving the nursing profession and ensuring high-quality patient care.

# STAFF SHORTAGE

## CONCLUSION

The nursing profession is at a pivotal point, facing both challenges and opportunities. By embracing current trends and addressing pressing issues, nurses can continue to provide high-quality care and advocate for their patients. Ongoing education, policy advocacy, and a commitment to innovation will be essential as the field of nursing evolves in the coming years.

# TIME TO ASSESS

Column A	Column B
1. Nursing Shortage	→ Use of online platforms to deliver patient care
2. Telehealth Adoption	→ Insufficient number of nurses in healthcare settings
3. Burnout and Stress	→ Rising concern about the well-being of nurses
4. Evidence-Based Practice	→ Making clinical decisions based on research
