EQUIPMENTS USED IN HOSPITALS

In order to ensure that patients get the proper care, doctors and nurses must use a wide variety of hospital supplies to examine, diagnose, and treat disease and injury. These supplies are varied in use and design, but all have one common factor: they help patients to get well. For this reason, orderlies and other attendants must be sure that all supplies are adequately stocked at all times.

There are many different categories of medical equipment and supplies, but the main categories are: electronic, diagnostic, surgical, durable medical equipment (DME), acute care, and storage and transport.

1: Storage and Transport Medical Equipment

- Case Carts
- Storage Carts
- Utility Carts

2: Durable Medical Equipment

- Wheelchairs
- Mobility assistive equipment - walkers, canes, crutches

- Hospital beds
- Ventilators
- Lifts
- Traction Equipment

3: Diagnostic Medical Equipment

- Imaging Machines such as X-Rays, MRI Scans, CT Scans, etc.
- Medical instruments like stethoscopes and thermometers.

4: Electronic Medical Equipment

- Software: Electronic Medical Records, Medical Imaging Software, etc
- Monitors: Heart Rate Monitors, Blood Pressure Monitors, Ultrasound, etc

- Medication Pumps
- Mobile Technology Carts: Mobile Workstations, Computers on Wheels, etc
- Powered Medical Equipment
- Pacemakers
- Defibrillators

5: Surgical Medical Equipment

- Surgical Tables
- Utility Tables
- Instrument Tables
- Hampers
- Mayo Stands
- Solution Stands
- Kickbuckets
- Surgical Table Pads
- Leg Supports
- Arm Supports

6: Acute Care

- General-purpose trays
- Minor procedure trays
- Wound and skincare kits
- Monitoring equipment
- Non-surgical instruments

7: Procedural Medical Equipment

- Surgical clamps
- Scalpels
- Forceps
- Gloves
- Operating Scissors
- Headlight

RYLES TUBE

- Suitable for nasogastric insertion for nutritional purposes or aspiration of intestinal secretion.
- Super smooth kink resistance tubing ensures uniform flowrate.
- Atraumatic, soft rounded, closed tip with four lateral eyes for efficient aspiration & administration.
- The tube is marked at 50,60 & 70cm from the tip for accurate placement.

- Proximal end is fitted with universal funnel shaped connector for extension.
- Color coded connectors for easy identification of size as per standards.
- X-Ray opaque line provided through out the length of Tube.
- Available with DEHP Free Material.
- Available with universal luer Connector.
- Tube Length : 105cm.
- Sterile / Disposable / Individual Packed.
