

Question Bank

Define Starch
Explain the Structure of Amylose
What is Polysaccharides
Define Starch
What is fatty acid
Define Oligosaccharides
Classification of Carbohydrates
What is Polysaccharides
Define Starch
Function of lipids
What is Simple Lipids

1. Illustrate the metabolic processes catabolism and anabolism
2. Classification of Lipids
3. Explain the functions of Cellulose and its structure
4. Important functions of Lipids.
5. Elaborate the reactions of glycolysis.
6. Importance of lipids and its occurrence
7. Compare and contrasts between Amylose and amylopectin
8. Classification of glucose Metabolism
9. Important functions of Cellulose.
10. Importance of lipids and its occurrence
11. Elaborate the reactions of TCA
12. Elaborate the reactions of glycolysis.
13. Elaborate the reactions of TCA
14. Explain about classification of lipids in detail
15. Explain the Fatty acid and its structure
