

SNS COLLEGE OF TECHNOLOGY

Coimbatore-35

An Autonomous Institution

Accredited by NBA – AICTE and Accredited by NAAC – UGC with 'A+' Grade

Approved by AICTE, New Delhi & Affiliated to Anna University, Chennai

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

SOFTWARE ENGINEERING

(Agile UX/UI)

UNIT 2 – AGILE DEVELOPMENT

TOPIC – Agile vs Traditional software development process

What is Agile ?

NON AGILE METHOD

- A project can take several months or years to complete and the customer may not get to see the end product until the completion of the project
- Allocate extensive periods of time for requirements gathering ,design ,development, testing and user acceptance testing before finally deploying the project

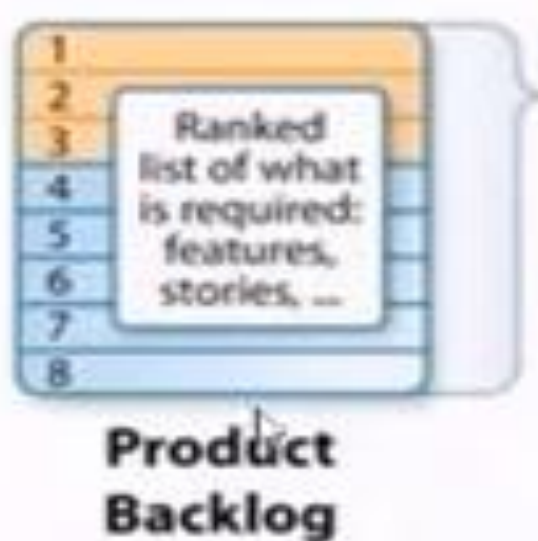

AGILE METHOD

- It have **Sprints or iteration** which are shorter in duration (which can vary from 2 weeks to 2 months) during which pre determined features are developed and delivered

The Agile Scrum Framework at a Glance

Inputs from Executives,
Team, Stakeholders,
Customers, Users

Sprint end date and
team deliverable
do not change

Every
24 Hours

Example of AGILE software development

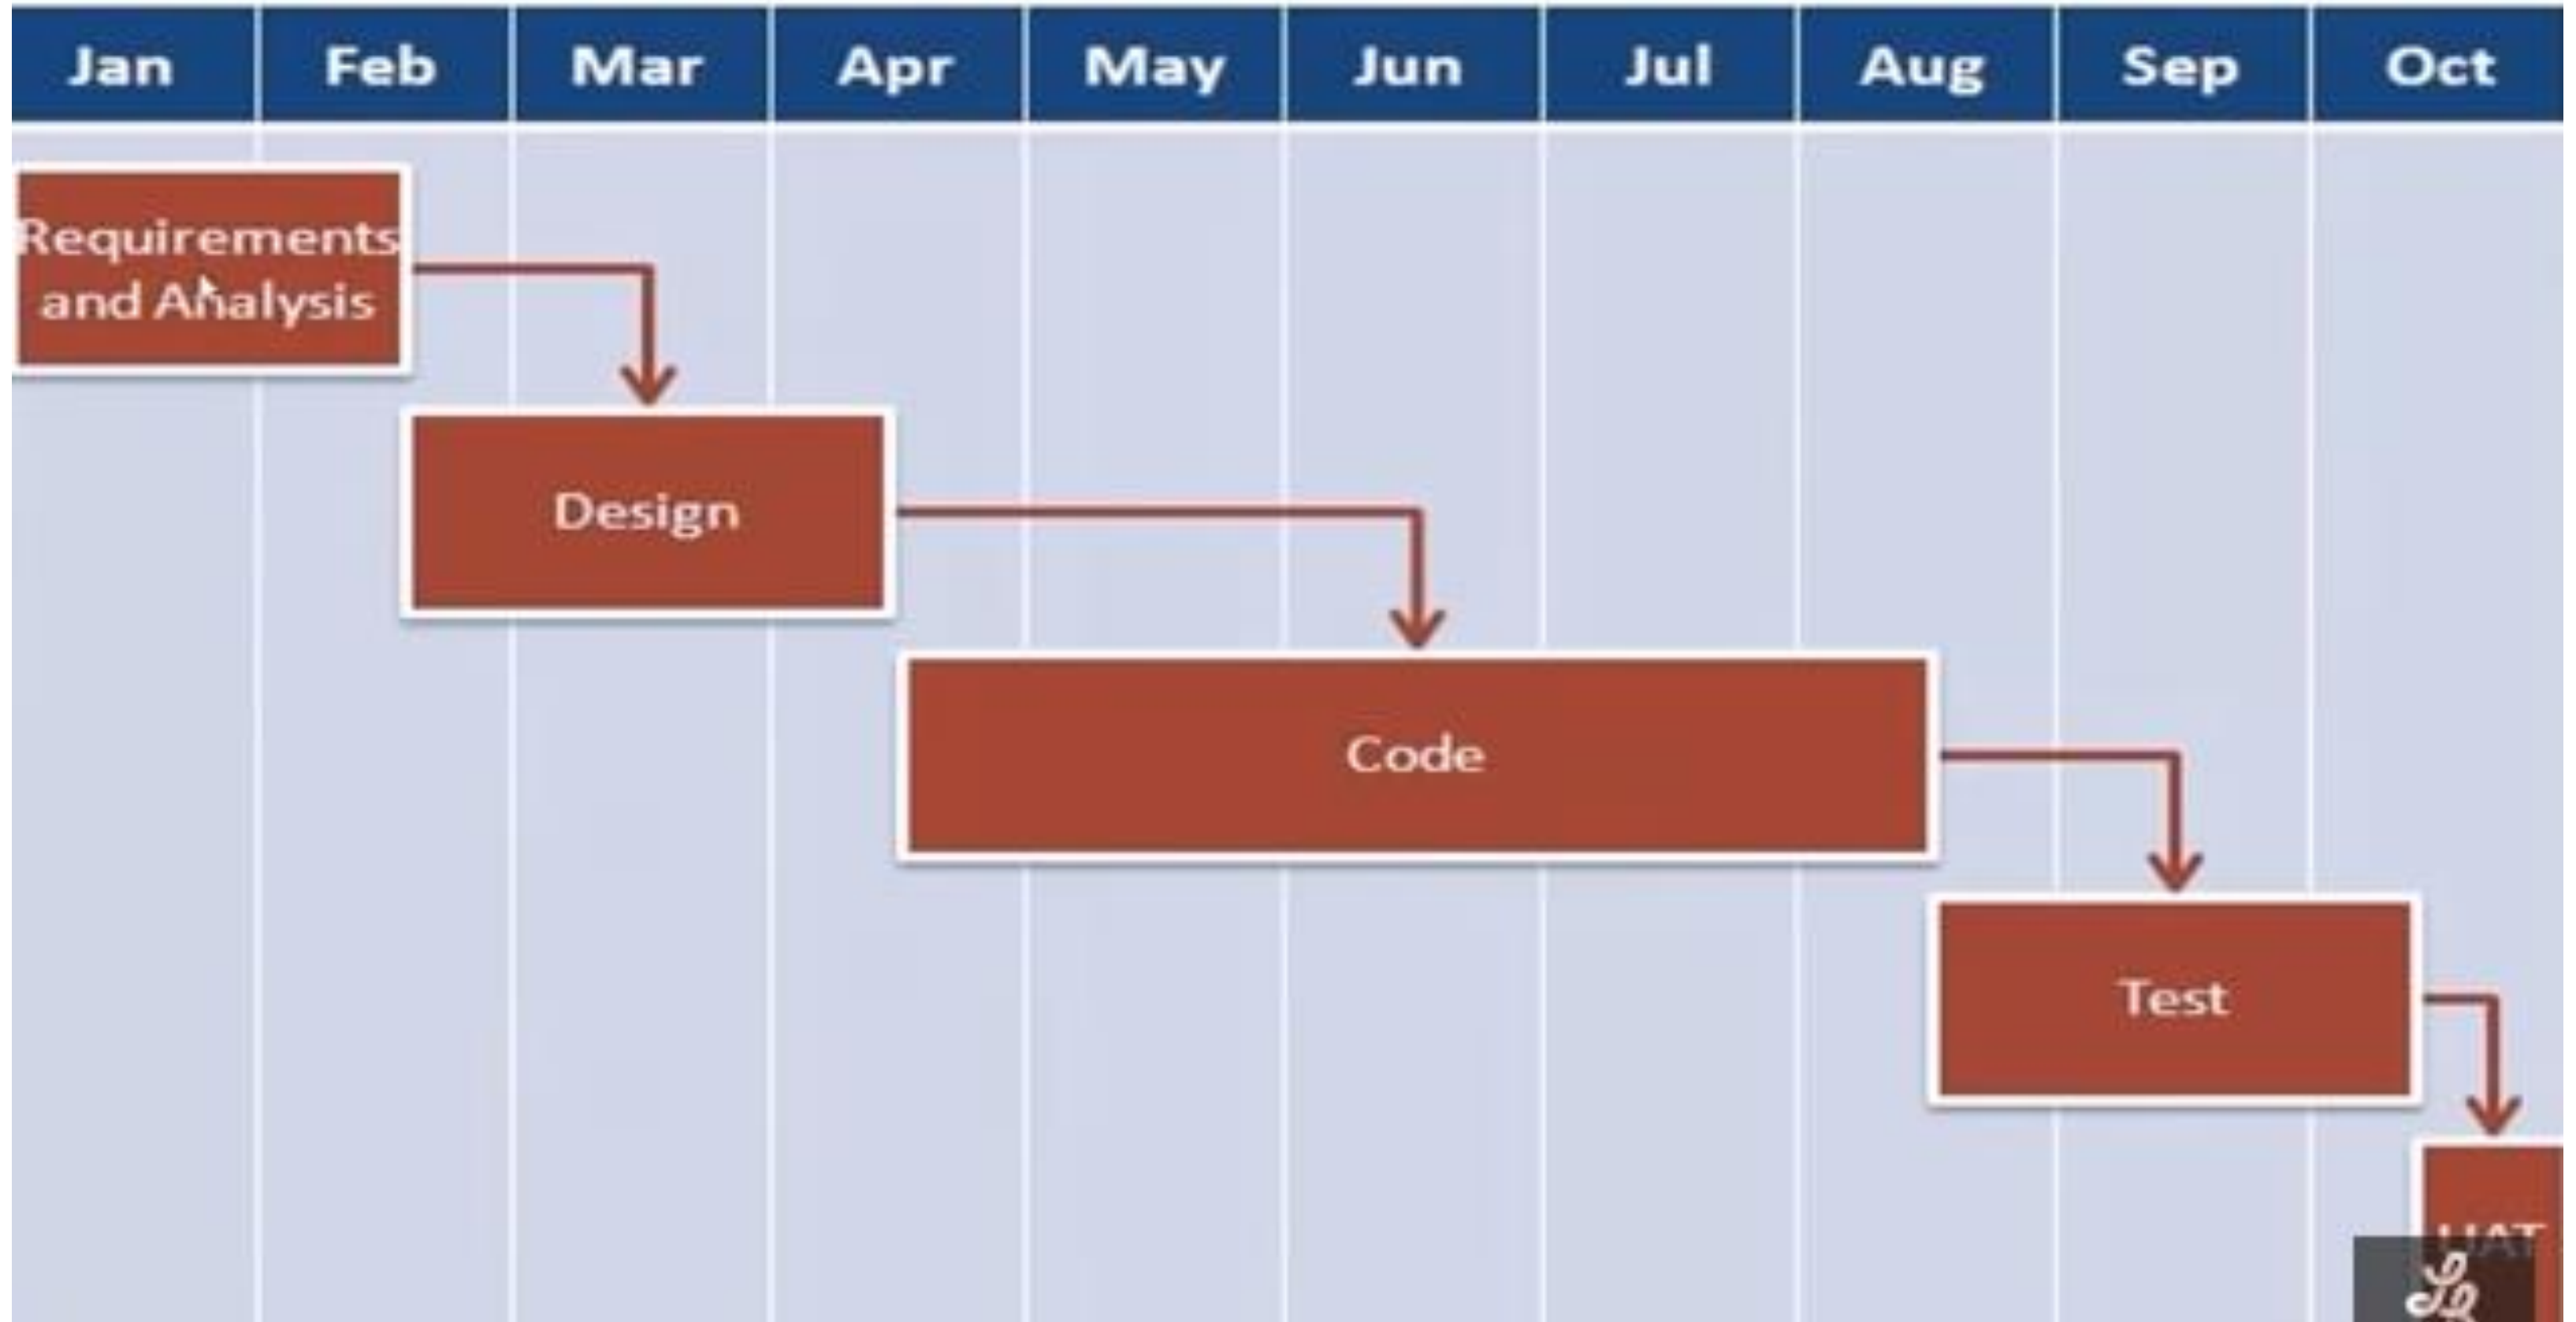

- **Product** –MS Word
- **Features** – All the features provided by MS Word and any other features requested by the marketing team
- **Duration** -10 Months

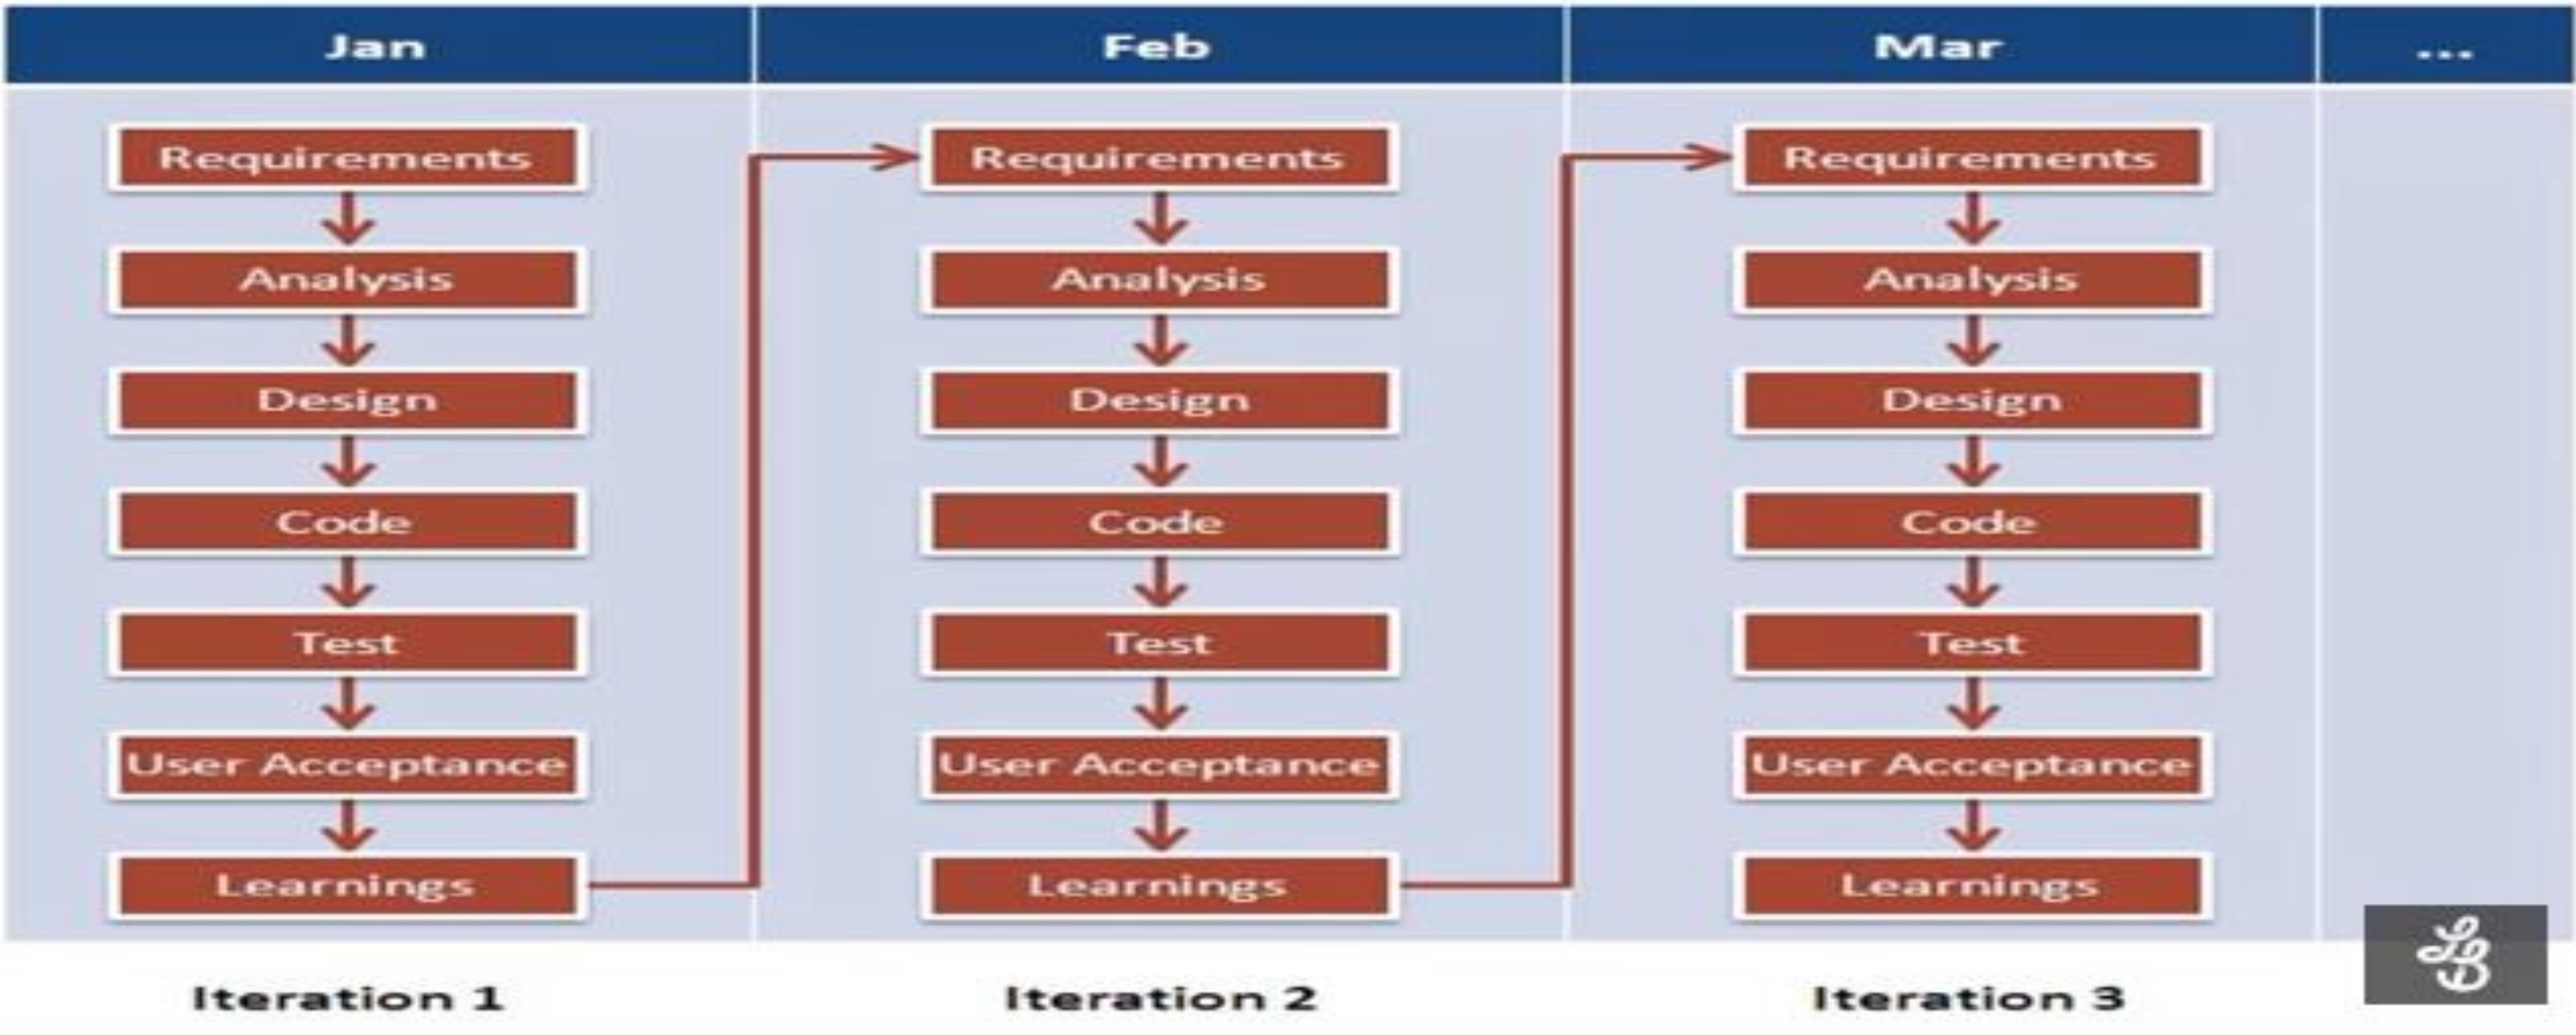

WATER FALL MODEL

AGILE METHODOLOGY

ADVANTAGES

- The delivery of software is unremitting
- Customer satisfaction is more here
- Changes of the product are done easily and on time
- The daily interactions are required between the business people and the developers. Attention is paid to the good design of the product

DISADVANTAGES

- Documentation is less
- Unknown risks may occur due to the lack of risk analysis which may leads to unexpected outcome rarely
