

# **SNS COLLEGE OF TECHNOLOGY**

**Coimbatore-35**

**An Autonomous Institution**

Accredited by NBA – AICTE and Accredited by NAAC – UGC with 'A+' Grade

Approved by AICTE, New Delhi & Affiliated to Anna University, Chennai

***DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING***

**SOFTWARE ENGINEERING**

**(Agile UX/UI)**

**UNIT 2 – AGILE DEVELOPMENT**

**TOPIC – Extreme Programming**

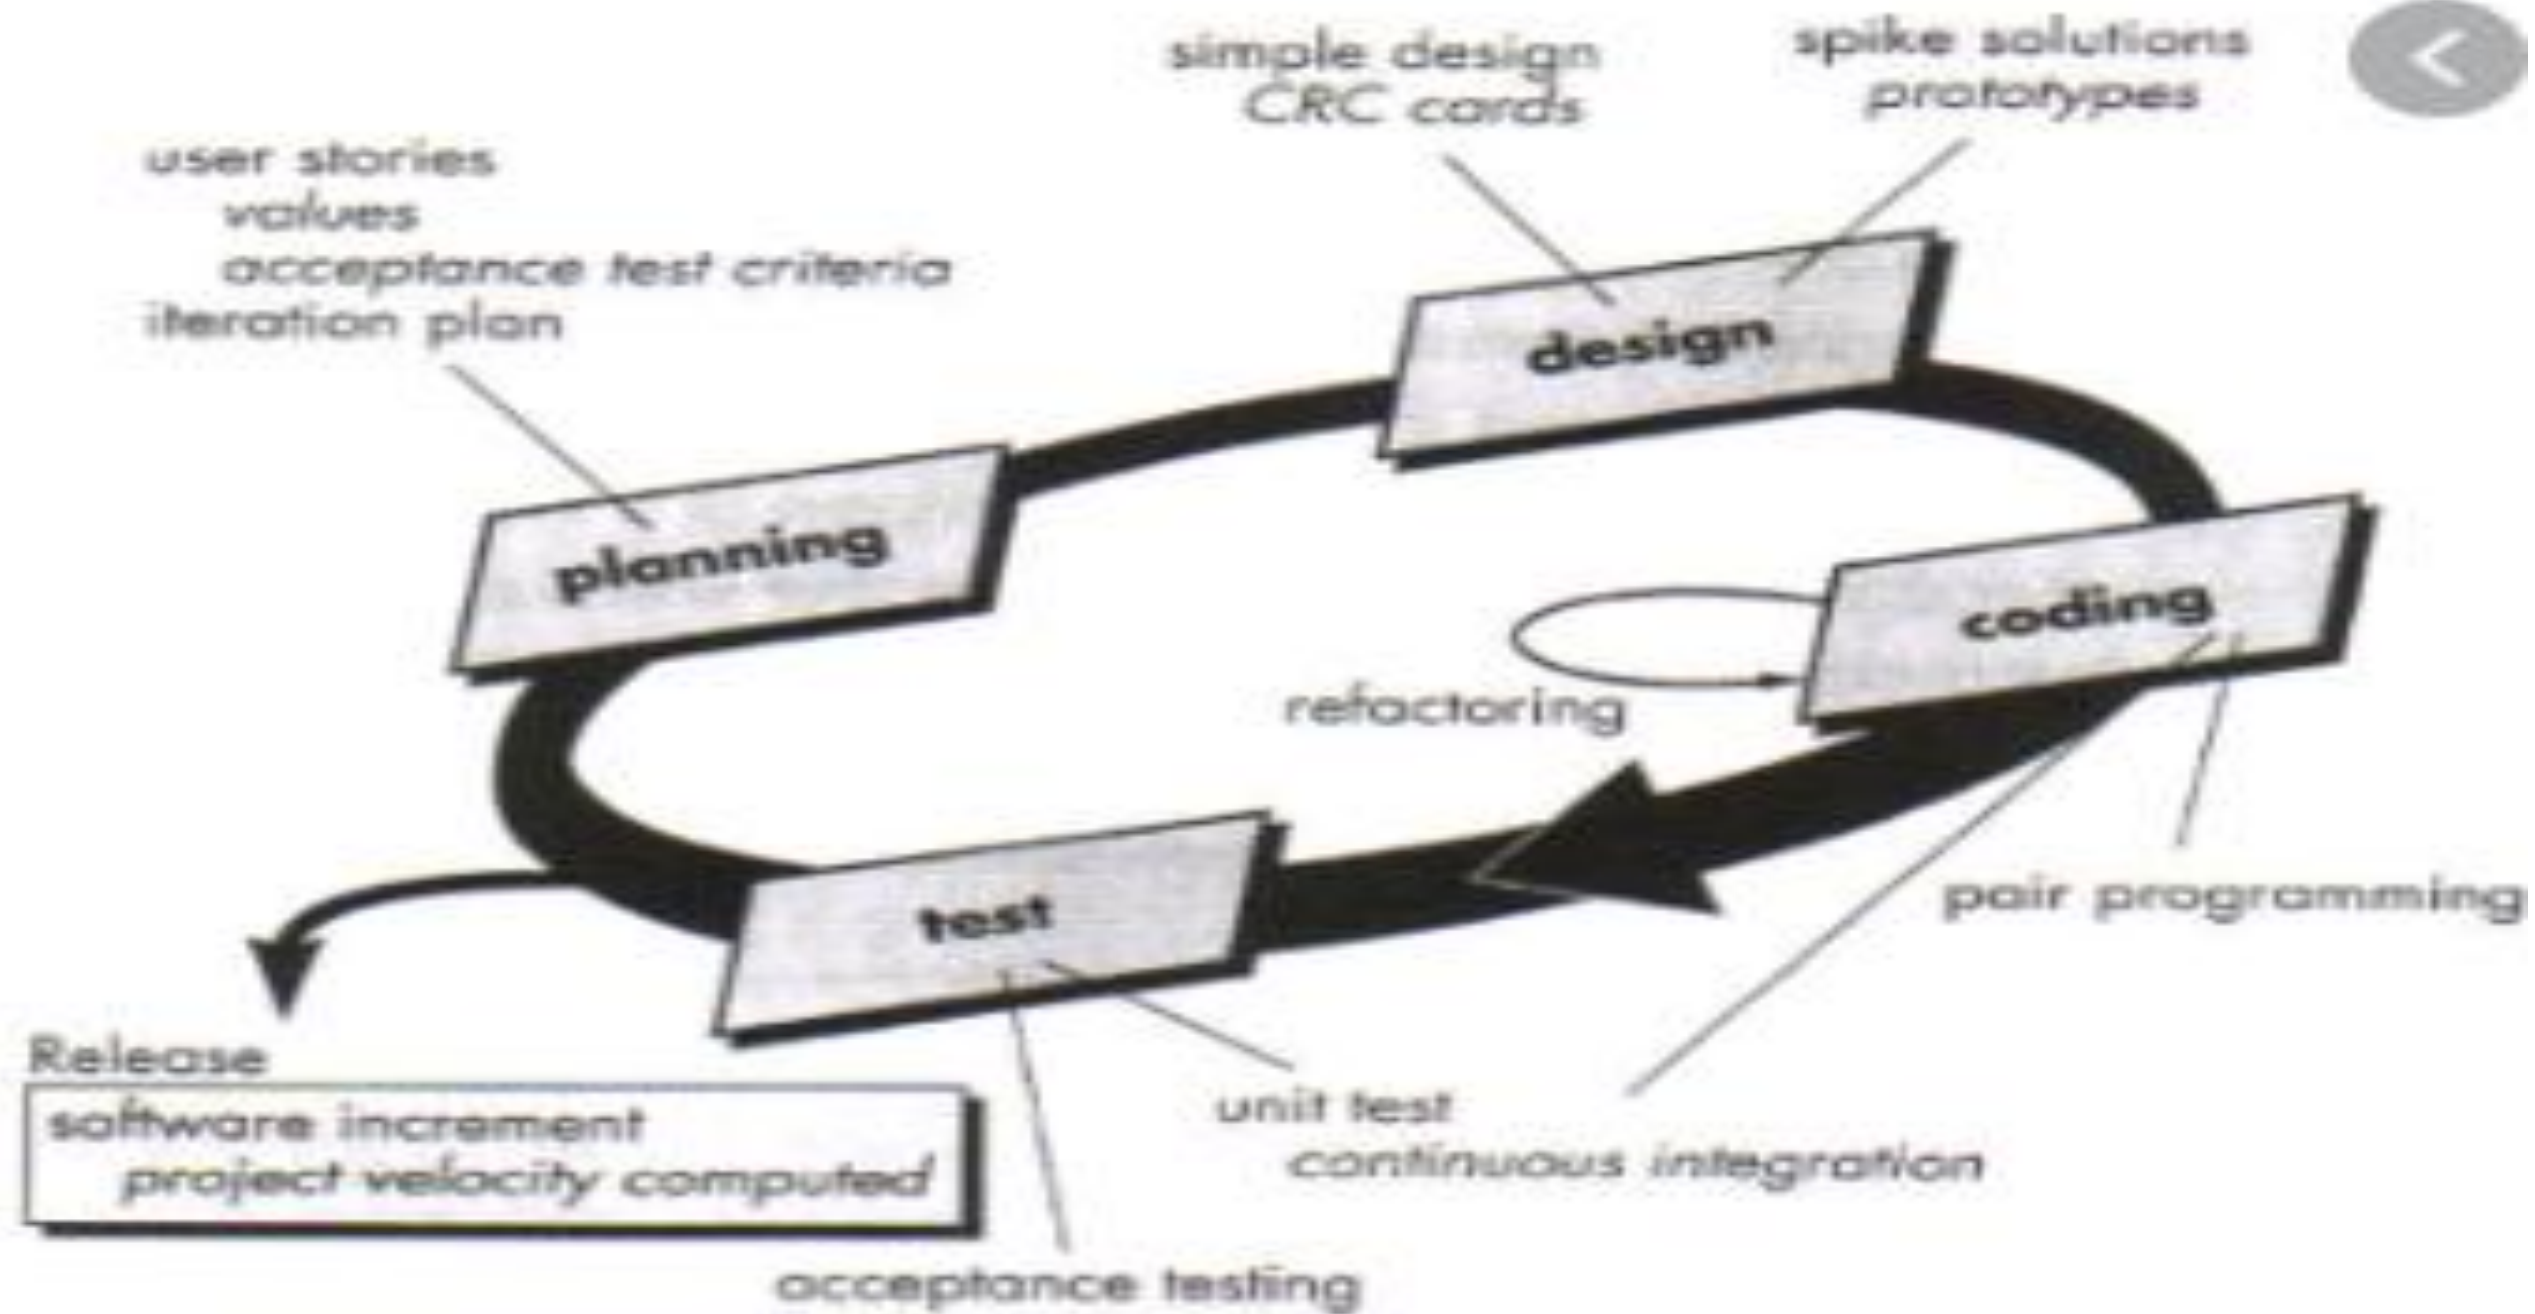

# Extreme Programming (Xp)

- Xp is most commonly used Agile process model
- Xp is a lightweight, efficient ,low risk ,flexible, predictable, scientific to develop the software
- Small to medium sized team that works under vague and rapidly changing environment

## **The five Xp values are :**

- Communication
- Simplicity
- Courage
- Respect

**Fig. Extreme Programming Process**

# The five Xp values

- **Communication** : The goal is to give all developers a shared view of system which matches the view held by the customer
- **Simplicity**: Xp encourage starting with the simplest solution ,extra functionality can be added in future if needed
- **Feedback** : From customer to team
- **Courage** : It enables developers to feel comfortable, with refactoring their code when necessary
- **Respect** : Include respect for others as well as self respect

# Extreme Programming (Xp)

## XP Processes:

### Planning :

- Begins with creations of user stories
- Agile team access each story and assign coast
- Stories /requirements are grouped for deliverable increments
- A commitment is made on delivery date

### Design :

- Encourage the use of CRC cards
- For difficult design problems , suggest the creation ‘spike solution’-a design prototype
- Encourage refactoring –an iterative refinement of internal program

# Extreme Programming (Xp)

## XP Processes:

### Coding :

- Recommends the construction of test case before coding commence (test driven development)
- Encourage pair programming

### Testing

- All unit test are executed daily
- Acceptance test are defined by the customer and executed to assess customer visibility functionalities
