

Artificial Intelligence is the process that  
Q. allows computers to learn and make  
decisions like humans

answer choices

True

False

Which of the following is a scenario

Q. where an AI is being asked to make an  
ETHICAL decision?

— answer choices —

- A self-driving car can only avoid one of two pedestrians and must choose which
- A chess computer must choose its next move
- A voice assistant is asked to schedule an appointment on the users calendar
- A voice assistant is asked whether the user will need an umbrella today

Many people question whether an AI can  
Q. make ethical decisions. What do we  
mean by ETHICS?

— answer choices —

---

- The laws of particular country
- The rules of behaviour imposed by a programmer or the AI creator
- A set of moral principles
- Human emotions

Q. Which one of these jobs COULD NOT be taken by a robot with AI?

answer choices

---

- Doctor
- Bank clerk
- Telephone sales person
- Shop worker

Q. Which of these jobs COULD be taken by a robot using AI?

— answer choices —

- Teacher
- Doctor
- Nurse
- Bank clerk

Q. Why haven't scientists been completely successful when developing AI?

answer choices

- They do not have the time or money
- The human brain is very simple
- The human brain is very complex
- They are trying to replicate the human heart

Q. Who was this man?

answer choices

- John von Neumann
- Donald Knuth
- Alan Turing
- Tim Berners-Lee

Which of the following tasks would an AI Q. be able to perform the LEAST successfully?

answer choices

- Suggesting what someone might want to buy from a shopping website
- Using traffic data to work out what cars people are likely to buy
- Playing hangman
- Writing a joke

Q. Which of these is NOT an AI technology

— answer choices —

- Facial recognition
- Image recognition
- Robotics
- Animation

Q. Which of these does NOT use machine learning/AI?

— answer choices —

- driverless cars
- SIRI/Alexa
- Sonos wireless speakers
- facial recognition on your phone

What means was devised to help work  
Q. out whether or not a computer can think  
like a human?

— answer choices —

- IQ test
- AI test
- Turing Test
- Machine Learning

Q. Which of the following is NOT a goal or feature of AI?

— answer choices —

- Reasoning/decision making
- Forward planning
- Displaying emotion
- Natural Language

Q. What is AI used for?

answer choices

---

- Healthcare
- Transportation
- Education
- All of the Above

Q. What is A.I?

answer choices

- Intelligence demonstrated by machines
- Smart robots
- Anthony Ian
- I don't know

Q. How does A.i work?

answer choices

- Combining large amounts of data with fast processing and intelligent algorithms, allowing the software to learn automatically from patterns or features in the data.
- The computation, mostly on computers, of antiderivatives and definite integrals in term of formulas
- It just works you know??
- Another super duper long answer to fool you guys to prove that not all longest answers are the correct ones, how is my quiz going anyway, i hope it is good, hope it is not too long though, thank you for not clicking
