

SNS COLLEGE OF TECHNOLOGY

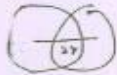

(AN AUTONOMOUS INSTITUTION)
SNS Kalvi Nagar, Saravanampatti Post
Coimbatore - 641 035

Approved by AICTE, New Delhi & Affiliated to Anna University, Chennai
Accredited by NBA & accredited by NAAC with 'A+' Grade, Recognized by UGC

Characteristics of a unit cell:

1. No. of atoms per unit cell: It represents no. of atoms present inside the unit cell.
2. Coordination number: The distance b/w no. of nearest atoms directly surrounding a particular atom in a crystal.
CN (high) \rightarrow closely packed
CN (low) \rightarrow loosely packed.
3. Nearest neighbouring distance (a)
The distance b/w the centre of two nearest neighbouring atoms (a)

4. Atomic radius:
half of the nearest neighbouring distance in a crystal.

$$- a = 2r \Rightarrow r = a/2$$

5. Packing factor (PF)

$$PF = \frac{\text{Total volume occupied by the atom in a unit cell (V)}}{\text{Total Volume of the unit cell (V)}}$$

$$= \frac{\text{No. of atom present in a unit cell} \times \text{Volume of one atom}}{\text{Total volume of the unit cell}}$$

PF (high) \rightarrow closely packed, PF (low) \rightarrow loosely packed.
