Inventory control

Types Of Inventory Control

Inventory Control Types

Periodic

Perpetual

PERIODIC INVENTORY CONTROL

The periodic inventory control system pertains to a recurring count of goods at specific intervals. In this system, warehouse managers manually count their inventory on a monthly, quarterly, or annual basis. The exact period depends on an organization's needs and business activities.

PERPETUAL INVENTORY CONTROL

The perpetual inventory control system provides an accurate count of inventory levels in real-time. It utilizes technology, such as barcodes and Radio Frequency Identification (RFID) tags, for tracking products. The information is then logged in a centralized database that warehouse managers can easily access.

PERPETUAL INVENTORY SYSTEM

- By Bhavya Chaturvedi & Harshwardhan Bhati

Assessment

- 1) A _____ is a method of inventory valuation in which a physical count or inventory is performed at specific intervals.
- 2) A perpetual inventory system is a program that continuously estimates your inventory based on your _____ , not a physical inventory.

Summary

Types of Inventory Control.
