

ITU – T Views

International Telecommunications Union – Telecommunications
Sector.

It provides standards for telecommunications and Information
Communication Technology such as X.509 for cyber security, Y.3172
and Y.3173 for machine learning.

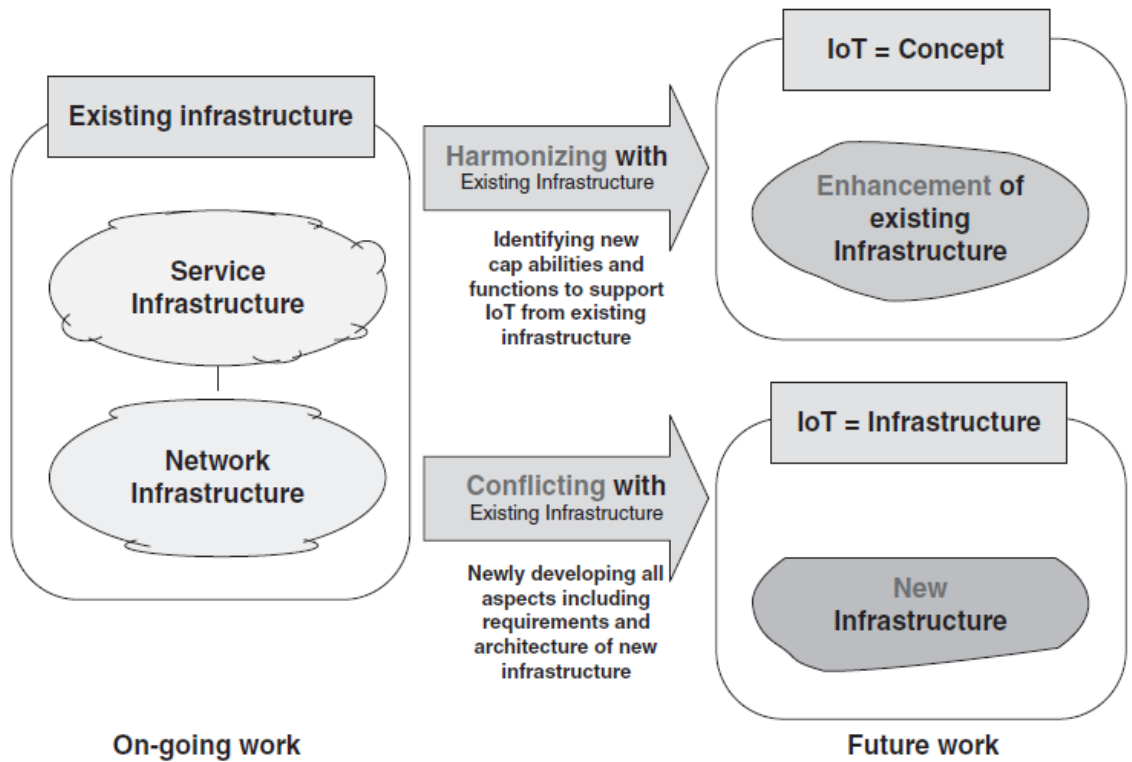

The ITU-T is in the process of identifying a common way to
define/describe the IoT.

Infrastructure View - Internet as an infrastructure provide a number
of technological capabilities.

Concept View - Internet as an concept provide an array of data
exchange and linkage services.

View A: IoT is just a concept (conceptual aspects of definition)

View B: IoT is an infrastructure: The IoT refers to an infrastructure.

Direction for standardization according to IoT definition.
