ITU – T Views

International Telecommunications Union – Telecommunications

Sector.

It provides standards for telecommunications and Information

Communication Technology such as X.509 for cyber security, Y.3172
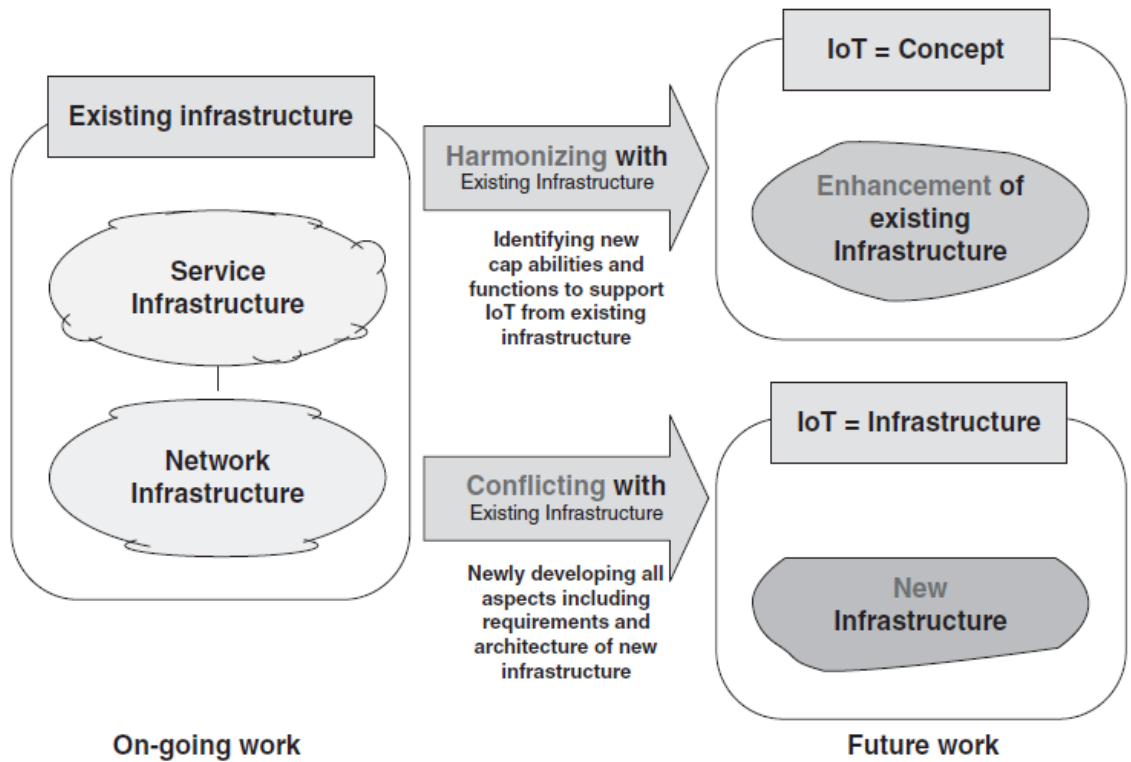

and Y.3173 for machine learning.

The ITU-T is in the process of identifying a common way to

define/describe the IoT.

Infrastructure View - Internet as an infrastructure provide a number

of technological capabilities.

Concept View - Internet as an concept provide an array of data

exchange and linkage services.

View A: IoT is just a concept (conceptual aspects of definition)

View B: IoT is an infrastructure: The IoT refers to an infrastructure.

Direction for standardization according to IoT definition.
