

Power systems

ACROSS

- 3 Device used to interrupt or break an electrical circuit.
- 5 Unit of electrical power.
- 6 Electricity is transformed for local distribution.
- 7 Network of high-voltage lines that carry electricity over long distances.
- 8 Material used for overhead power transmission lines.

DOWN

- 1 Step up voltage for long-distance transmission.
- 2 Process of reducing the voltage of electricity for local use.
- 4 Temporary interruption of electrical power.
