An Amazing Fact a Day

## Fruit and Vegetables

## **Amazing Fact**

Modern fruits and vegetables that we eat today have been selectively bred and look very different to the equivalents that would have been eaten by our ancestors.

Farmers can choose the best-looking fruits and vegetables and then use the seeds from these to grow more that look similar. This way, over time, they can change the way fruits and vegetables look.

## Challenge

Complete the crossword on the following page, using the clues below.

## Across
