UNIT-II ORDINARY DIFFERENTIAL EQUATIONS

Homogeneous Linear ODE with constant coefficients

JAN - I

Differential Equation .

An apr. Phyolving differential coefficients 024 descivations is called differential apr.

addrawy deflerential eqn.

A deferented on which depends on

only one Andependent voulable is called or denouged

Order and degree :

* The order of the highest descrative occurring in the given ogn is called the order of a differential eqn.

to the degree of the bighest description of a Fin the gran. By called the degree of a differential eqn.

Second order Process ODE with constant wefficients: The general 19noar ODE with constant wefficients is of the form

 $a_{0} \frac{d^{h} y}{dx^{n}} + a_{1} \frac{d^{h-1} y}{dx^{h-1}} + a_{2} \frac{d^{h-2} y}{dx^{h-2}} + \dots + a_{n} y = f(x)$ where $a_{0}, a_{1}, \dots a_{n}$ are constants and $f(x) \geq a \quad y = 0 \quad a_{1} \times \dots \quad a_{n} \times x$ when $f(x) = 0 \quad q_{n}$ (1) $\leq called$ homogeneous one \leq

If fail to an (1) is called hombomogeneous ODE &

UNIT-II ORDINARY DIFFERENTIAL EQUATIONS Homogeneous Linear ODE with constant coefficients This apr. can be wratten as, $\left[a_0 D^n + a_1 D^{n-1} + a_2 D^{n-2} + \dots + a_n\right) y = f(x_1)$ where $D = \frac{d}{dx}$ Soluteon = CF+ PI = complementary function + Particular "integ TO find EF: Roots CF 1). ROOTS are real & deficient Aemix + Bemax mit ma i `n). Roots are real & Same (A+ Bx) ema $m_1 = m_2 = m$ Roots are maginary. (a complex) en [A cos px + B Sin p: in). m=a±iB To fend pI: $PI = \frac{1}{f(D)} \frac{f(x)}{f(x)}$ RHS = 0J. Solve (D-5D+6)=0 Soln. The auxeloury eqn. 38 $(m^{2}-5m+b=0)$ (m-3)(m-2)=0m = 2, 3.". The MOOLE are shear and althornent.

UNIT-II ORDINARY DIFFERENTIAL EQUATIONS

Homogeneous Linear ODE with constant coefficients

$$(m^{2})^{2} - 1^{2} = 0$$

$$(m^{2}+1) (m^{2}-1) = 0$$

$$(m^{2}+1) (m^{2}-1) = 0$$

$$m^{2}+1 = 0$$

$$m^{2}=-1 - m^{2}=1$$

$$m^{2}=1$$

$$m^{2}=1$$

$$m^{2}=1$$

$$m^{2}=1$$

 $\therefore cf = Ae^{a} + Be^{-x} + c\cos x + DSin x.$
